3. Operational conditions for which the exposure scenario ensures control of risk
3.1 Operational conditions related with substance/ product
Physical form of product in which the substance is contained: Liquid % solution (vapour pressure 0.00016 kPa % 1172 °C)
Concentration of substance in preparation or article: Covers percentage substance in the product up to 100 %
Duration of exposure at workplace: > 4 hours/day - Except for PROCs 7 and 11: Avoid operations for more than 1 hour
Frequency of exposure at workplace: Covers frequency up to: daily use, weekly, monthly and yearly.
Annual amount used: Unlimited
3.3 Other relevant operational conditions: Indoor and outdoor operations.
4. RMMs that, in combination with the operational conditions of use, ensure control of risk.
4.1 RMMs related to workers.
General: Whenever handling sodium silicate as a substance on its own (powder/ granules or liquid) or in a mixture outside closed systems, suitable personal protective equipment are the preferred and only measure of control. Definition of PPE will depend on the use and concentration.
Organisational measures: Procedural and/or control technologies are required to minimise emissions and the resulting exposure during cleaning and maintenance procedures or if there is a risk of the occupational exposure limit being exceeded.
Technical measures: PROC 7, 11: Provide enhanced general ventilation by mechanical means if respiratory protection is not available.
Respiratory protection: Wear a respirator conforming to EN140 with Type A/P2 filter or better. Specifically required for PROC 7, 11.
Hand protection: Wear suitable gloves (tested to EN374).
Eye protection: Wearing of eye/face protection is required. Chemical goggles should be consistent with EN 166 or equivalent.
Skin and body protection:

SAFETY DATA SHEET

CALDE® TROWEL HF 36 U

Version: 20
MAM30028

Wearing of suitable protective clothing is required.

Hygiene measures:

Good basic standards of occupational hygiene assumed to be implemented:
Keep away from foodstuffs, drinks and tobacco. Wash hands before breaks and at end of work.
Keep work clothes separate. Take off immediately all contaminated clothing. Wash thoroughly after open handling of the product.

4.2 Environment related measures; type and efficiency of single options or combination of options on exposure to be quantified; options to be phrased as instructive guidance

Not required, as soluble silicates, including sodium silicate, do not meet the criteria for classification as dangerous to the environment according to 67/548/EEC (See Article 14.4 of REACH Regulation). Furthermore, as high production volume substances, soluble silicates have been reviewed to a great extent for their exposure potential to the environment and the possible risks arising from their release (Van Dokkum et al. 2002, OECD SIDS 2004, HERA 2005, and CEES 2008). It was concluded that soluble silicates are currently of low priority for further work because of their low hazard profile.

5. Prediction of exposure resulting from the conditions described above and the substance properties.

Workers (oral):

Negligible oral exposure due to good hygiene practice

Workers (dermal): DNEL (dermal, worker): 1.59 mg/ bw kg/day

Estimated Exposure Concentrations: 0 mg/cm²

Dermal exposure is prevented by personal protective equipment (protective clothing, gloves, goggles) which is mandatory because of potential corrosive properties of sodium silicate.

Workers (inhalation): DNEL (inhalation, worker): 5.61 mg/ m³

Calculated with ECETOC TRA

Spraying operation with PPE – 25% solutions: 3.7 mg/m³

Spraying operation with PPE – > 25% solutions – < 1hr: 4.9 mg/m³

Environment: Not required

6. Guidance to check compliance with the Exposure Scenario

Predicted exposures are not expected to exceed the DN(M)EL when the Risk Management Measures/Operational Conditions outlined in this exposure scenario are implemented.

Where other Risk Management Measures/Operational Conditions are adopted, then users should ensure that risks are managed to at least equivalent levels.
